Number of positions: 20
Departments: Architect, Product Development/Engineering, Analytics, Performance Testing, Cloud Engineering
Location: Greece, Patras
Talent Area: Product Development/Engineering
Job posting title: Software Engineer Intern

Position Summary

Citrix is looking for Software engineering internships with individuals featuring background on networking, Linux and automation.
We believe work is not a place, but rather a thing you do. Our technology revolves around this core philosophy. We are relentlessly committed to helping people work and play from anywhere, on any device. Innovation, creativity and a passion for ever-improving performance drive our company and our people forward. We empower the original mobile device: YOU!

Responsibilities

- Develop high performance system and network applications on Linux, FreeBSD or other UNIX platforms
- Develop Cloud based (AWS, Azure, Google Cloud) networking services
- Develop and maintain CI workflows of testable, maintainable code
- Develop and Improve internal tooling and automation
- Troubleshoot, diagnose, address functional and performance issues
- Develop modern, user-friendly Frontends for existing or new Services

Qualifications and Requirements

- Programming knowledge: C/C++/Shell/Python/Other
- Good Linux background
- Knowledge of Internet technologies (e.g. HTML, XML), and internetworking protocols (e.g. IP, TCP and HTTP)
- Excellent verbal and written Greek and English communication skills
- Analytical skills for data-driven decision-making

Desirable attributes

- Software development experience, tools and methodologies
- Exposure to cloud services: OpenStack/AWS/Azure/Google Cloud
- Exposure to VMware and/or XenServer virtualization environments
- Knowledge of Javascript, HTML5, AngularJS or similar frameworks
