massiveGRID

Software QA Engineer - Internship

We are MassiveGrid, a global high-end Service Provider, with more than 15 years of hands-on experience in the fields of high-availability service hosting, turn-key service solution and development. Our services are designed for demanding clients that run Business-Critical Services or need high performance and large network capacity.

We are a team of passionate engineers that our extensive technical expertise and broad experience in problem solving allows us to provide high-quality customized telecoms & IT solutions to any technological challenge.

We are looking for a self-motivated student with enthusiasm and ability to develop technical skills and discover his/her technical expertise career path.

Your responsibilities will include:
- Help design and execute automation scripts using open source tools.
- Participate in development and application of testing processes for new and existing services based on client requirements.
- Documentation and record keeping.
- Working closely with the QA manager for automation development tasks.
- Partner with highly skilled developers.
- Sharing learning and innovations with your team.

Knowledge & Skills:
- Understanding of at least one of the following tools: (Testrail, TestProject, Selenium, Cucumber, Sonarqube, Jira Zephyr).
- Basic knowledge of version control tools like Git will be appreciated.
- Familiarity with Linux and open source technologies is also a plus.
- Passion for software QA engineering and a keen interest in personal development.
- Energy, initiative, and a positive attitude.
- Teamwork spirit and strong communication skills.

We Offer:
- Fully remote options.
- Access to books, online courses and relevant educational resources.
- Being part of a workplace that offers continuous learning and development and incredible opportunities to upgrade your career.
